

## **Superfast Broadband Coming Soon to Lismore**

Design work on the infrastructure, to connect subscribers on Lismore to this community-led superfast broadband service, will soon be under way.

This design work will be greatly assisted by the prior registrations of interest already made by many on the island.

If you have not yet registered and think that you may be interested in receiving this new superfast service, enabling, amongst other things, trouble-free downloading of high definition films and video streaming, online gaming, etc., together with high speed uploading of, for example, high quality photographs and videos, then you are encouraged to register your interest without delay.

Go to [www.gigaplusargyll.co.uk](http://www.gigaplusargyll.co.uk), click on “Contact” and complete your details.

Please be reassured that prior registration is not a pre-requisite for you to choose to subscribe to GigaPlus Argyll broadband at a later date, but registration now will increase the likelihood that service access to your property will be accommodated by the infrastructure design soon to get under way.

You are welcome to contact Julian Wormleighton (GigaPlus Argyll Steering Group member and director) if you wish to discuss any aspect of the new service.
